**VAVS360FRP Software Update**

Components needed:
IR Receiver and Remote.
Software to be used found here:
S:\Public\Engineering\360 CUSTOMER SOFTWARE\VAVS360FRP

Updating:

1. Load the folder labeled "APP_UPDATE" onto a Thumb Drive.

2. With the desired Software on the USB, insert the USB BEFORE powering on the Module.

3. Power on the Module and the Display will show a Squid Ink Blue Truck Image, then it will start its Update. (Update takes about 30 seconds)

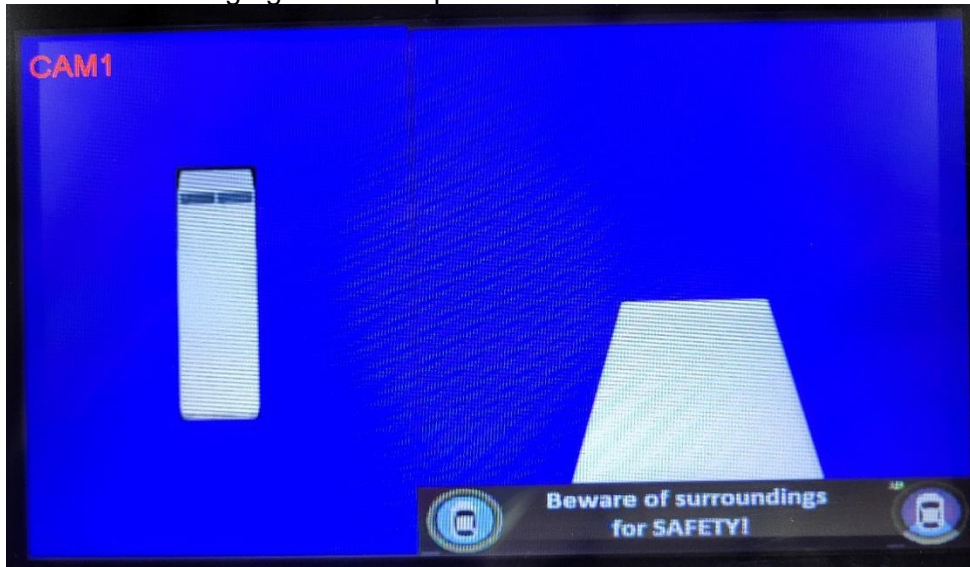

4. Once Updating is completed it will say 'Update Successful,' at this point remove and cycle the Power on the Module.

Testing Software

1. Once the Monitor and System have booted up, the 360 View will be displayed as shown below:
    *Note: Truck image goes from Squid Ink Blue to White

2. On the Test Box, Turn the CA1 Switch to ON and touch the Blue Wire on the Text Fixture to the Blue Wire on the Module, the Module should switch to the Image below:
