

AN140 Installation Guide

Date Released:	09-19-2016	Tracking Number:	IG-AN140
Document Revision:	A		
Date Revised:	-	Written By:	T. Smale
Model/Part No.:	AN140		

Assembly: Dual Element Antenna with +30" coax cable.

Installation Guidelines:

- Plug antenna into radio.
- Utilize the full length of coax to better isolate the elements away from existing harnesses.
- Fully extend the antenna elements and route them in two different directions.
- Secure the elements where possible to maintain their positions.

Notes:

- Performance will vary depending on ability to place elements away from sources of interference.
- Routing elements in a vertical position may improve reception.
- Recommend testing radio reception while boat is in use to better determine overall performance.
