Ducted Ceiling Assembly featuring FlashFreeze

A Shower of Crisp, Cold Air.

Advent Air, the leader in premium A/C appliances, presents a new ducted ceiling assembly featuring FlashFreeze. Campers will now feel a shower of refreshing, crisp air that will radiate down to cool an area quickly and efficiently. The improved, curved cosmetics make a departure from the rigid, industrial look of other RV ceiling assemblies.

And form truly follows function with the innovative louvered openings.

KEY FEATURES:

- FlashFreeze quickly cools the RV by allowing direct airflow from the upper unit to blow straight down into the RV living area
- Aerodynamic, contoured design
- Easily installs in standard vent opening
- Compatible with all Advent A/Cs (AC135, AC150, AC135HP, AC150HP)
- For use with Advent Air analog or digital thermostats (ACTH11, ACTH11B, ACTH12, ACTH12B)
