

Voyager®

EXPAND YOUR VISION.

BOOST YOUR PROFITS

PREWIRED FOR Voyager®

The latest development from Voyager opens the door for easy upgrades on thousands of RVs & trailers annually. Our prewired camera systems will help boost profits in three easy steps.

1. Identify the Opportunity

The following RVs are already being prewired for Voyager wireless observation systems:

- Cardinal Explorer
- Cardinal Limited
- Cardinal Luxury
- Coachmen Apex
- Coachmen Spirit
- Forest River Viking
- Keystone Hideout
- Keystone Outback
- Keystone Passport
- Keystone Springdale
- Winnebago Minnie
- Winnebago Minnie Micro
- Winnebago Minnie Plus
- Winnebago Minnie Drop

More to come!

2. Upsell the Product

The two Voyager wireless observation systems that are compatible with the prewired socket include:

- WiSight camera, capable of transmitting images in real-time at freeway speeds
- LCD monitor
- Suction cup monitor mount
- 12 volt DC plug

3. Close the Deal

There is virtually no installation time with this system. Whether your customer is buying a new RV or stopping in for routine maintenance, there's no extra wait time.

- The wireless camera plugs directly into the pre-installed socket and is mounted using the same screws from the *Voyager WiSight Technology* plate
- The monitor is installed using a suction cup mount and draws power from the existing 12 volt DC accessory port

NOTE: These systems are **only** compatible with Voyager® prewired vehicles.
