CONTROL SYSTEMS

iN-Command[®]

CONTROL SYSTEMS

iN-Command[®] Control Systems usher in the next generation of campsite control, acting as the central hub of operations to control and monitor an array of systems in your RV. iN-Command[®] Control Systems with Global Connect has been chosen as the first-ever RV control system compatible with 2020 Chevrolet Silverado and GMC Sierra Heavy Duty trucks. The myChevrolet and myGMC apps for Apple and Android smartphones work with iN-Command[®] with Global Connect* to create a seamless experience.

Our latest advancement, iN-Command **Global Connect[™]**, allows you to control select functions of your RV using your smart device from anywhere in the world.

The only SMART trailer
system used by

Display Commander

Unified Wiring Standard

iN-Command® Control Systems utilize a new unified wiring standard.

What does this mean for you?

- Continuity across all product lines
- Less diagnostic time
- Fewer warranty replacements
- Easier training for new hires

*Travel Lock Out disables all motorized functions of the RV and is activated when the brake on the tow vehicle is engaged. It can be turned off by pressing "Unlock" directly on the Display Commander inside of the RV.
