

## **73066 & 73086 Troubleshooting Guide**

### **NO SIGNAL or ACQUIRING SIGNAL is displayed on radio when in Sirius mode**

- Verify antenna has an unobstructed view of the sky. Change vehicle location to eliminate nearby obstacles such as large buildings, trees, bridges, etc.
- Make sure it is not installed too close to other items that may block signal reception, such as roof air conditioners, TV satellite antennas, etc.

### **ANTENNA displayed on radio**

- Antenna is not connected to Sirius receiver. Verify antenna is connected to antenna input on Sirius receiver.
- Antenna is damaged or defective. Replace antenna.
